

Inteligencia Artificial Para el Bien Social

Jesús Alfonso López jalopez@uao.edu.co

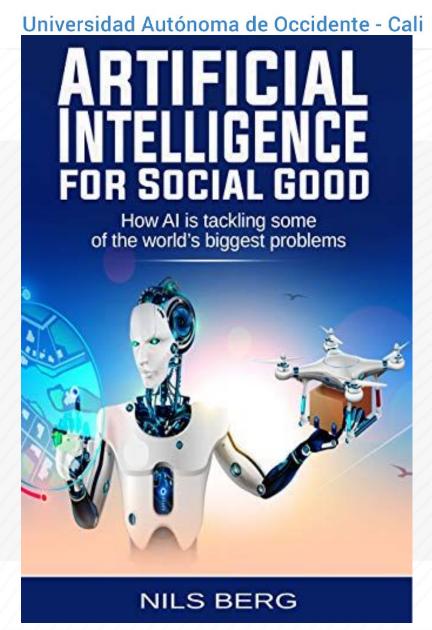

IA para el Bien Social (Al4SG)

IA para el Bien Social (AI4SG)

Al for social good (Al4SG) es un campo de investigación relativamente nuevo que se enfoca en abordar importantes desafíos sociales, ambientales y de salud pública que existen hoy en día utilizando Al. Inicialmente, esto puede sonar como un truco para tratar de cambiar la visión tradicionalmente negativa de la IA, pero es más que eso.

https://towardsdatascience.co m/introduction-to-ai-for-social-g ood-875a8260c60f

> https://www.amazon.com/-/es/Nils-Berg-ebook/dp/B07PT3X75T

AI4SG: Criterios

- Importancia del problema. El problema del impacto social considerado es significativo y, hasta el momento, la comunidad de IA no lo ha abordado adecuadamente.
- Novedad de enfoque. Introduce un nuevo modelo o mejora sustancialmente los modelos existentes, las técnicas de recopilación de datos, los algoritmos y/o las técnicas de análisis de datos.
- Alcance y promesa de impacto social. Alta probabilidad de impacto social de la solución, posiblemente siendo utilizada en la práctica o podría ser utilizada inmediatamente.
- Confianza en y/o avance de técnicas de inteligencia artificial de vanguardia. Introduce técnicas de IA novedosas o de última generación adecuadas para el problema que se está resolviendo.

Objetivos de Desarrollo Sostenible

Universidad Autónoma de Occidente - Cali

El campo se centra en generar un impacto social positivo de acuerdo con las prioridades descritas en los 17 Objetivos de Desarrollo Sostenible (ODS) de las Naciones Unidas.

17 ALIANZAS PARA Lograr

LOS OBJETIVOS

#JuntosSomosMásFuertes

Al has enormous potential for social good and promoting the achievement of the SDGs if it develops in a way that benefits humanity, respects global norms and standards, and is anchored in peace and development

https://www.unesco.org/e n/artificial-intelligence

Human-Centered Artificial Intelligence Stanford University

La inteligencia artificial tiene el potencial de ayudarnos a hacer realidad nuestro sueño compartido de un futuro mejor para toda la humanidad, pero traerá consigo desafíos y oportunidades que aún no podemos prever.

En Stanford HAI, nuestra visión para el futuro está liderada por nuestro compromiso de estudiar, guiar y desarrollar tecnologías y aplicaciones de IA centradas en el ser humano. Creemos que la IA debe ser colaborativa, aumentativa y mejorar la productividad humana y la calidad de vida.

https://www.youtube.com/watch?v=se4CQ5UZXaM

https://ai-4-all.org/

Creemos que la IA proporciona un poderoso conjunto de herramientas a las que todos deberían tener acceso en nuestro mundo en rápido cambio. La diversidad de perspectivas y voces desbloqueará el potencial de la IA para beneficiar a la humanidad. Cuando personas de todas las identidades y procedencias trabajan juntas para construir sistemas de IA, los resultados reflejan mejor a la sociedad en general. Diversas perspectivas producen productos y sistemas más innovadores, centrados en el ser humano y éticos

IA y Cambio Climático

Universidad Autónoma de Occidente - Cali

IA en Sistemas Eléctricos

- Facilitando la electricidad con baja huella de carbon
- Reduciendo los impactos de los sistemas actuales
- Asegurando impacto globales

IA y Cambio Climático

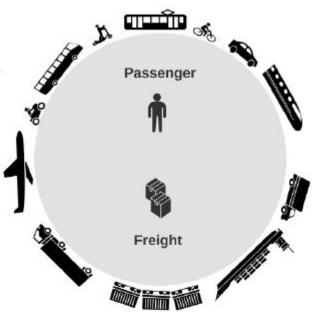

Reducing transportation activity

Analyzing data
Remote sensing
Forecasting
Freight consolidation
Alternatives to transport

Modal shift

Consumer choices
Coordinating modes
Bike share rebalancing
Predictive maintenance
Enforcing regulation

Vehicle efficiency

Designing for efficiency
Detecting loading inefficiency
3-D printing
Autonomous vehicles

Alternative fuels

Research and development

Electric vehicles

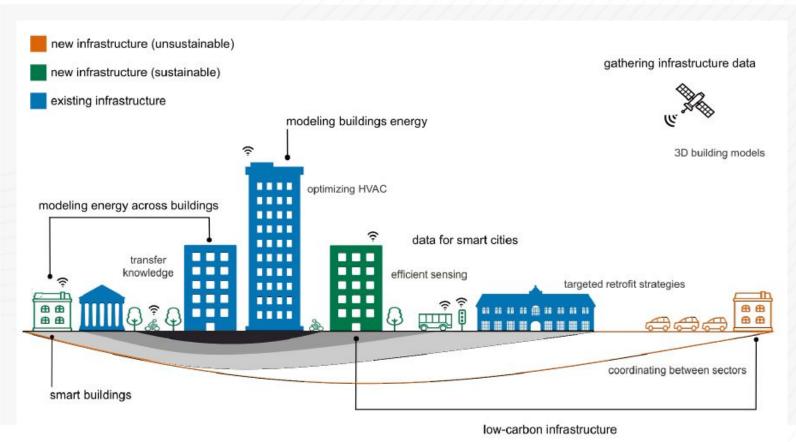

Charging patterns
Charge scheduling
Congestion management
Vehicle-to-grid algorithms
Battery energy management
Battery R&D

IA en el Transporte

- Reduciendo la actividad del transporte
- Mejorando la eficiencia de los vehículos
- Desarrollando combustibles alternativos y formas de electrificación

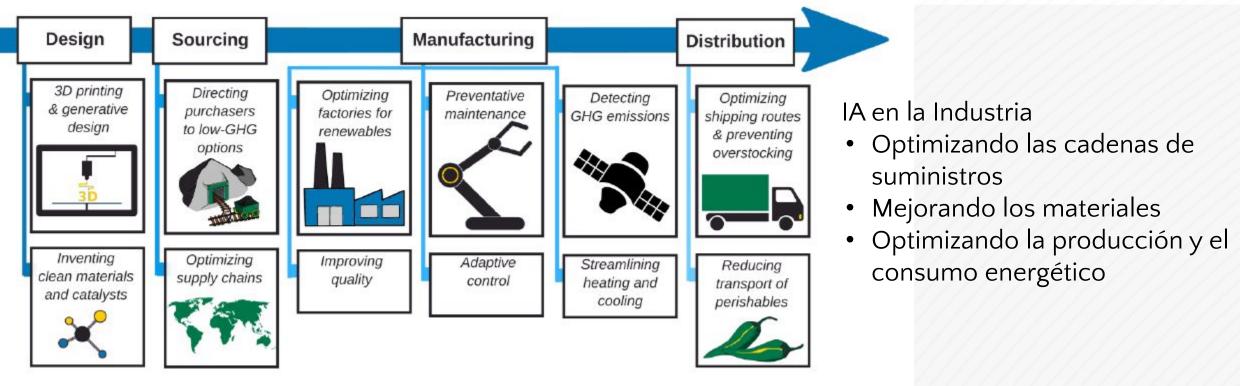

IA y Cambio Climático

IA en el Edificaciones y Ciudades

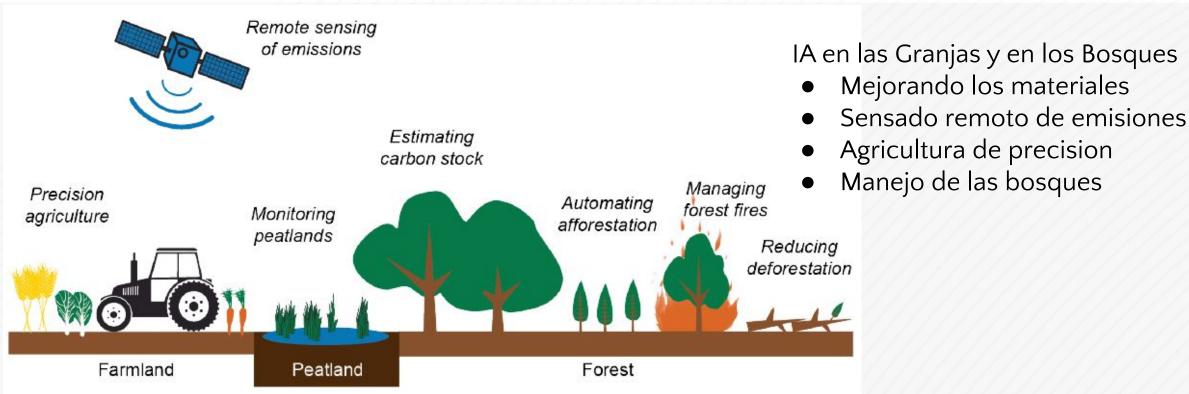

- Optimizando las edificaciones
- Planificación urbana
- Ciudades inteligentes

IA para el Bien Social: Algunos Campos de Universidad Autónoma de Occidente - Cali **Aplicación**

	More developed	Person identification (image and video)	 Identifying a known missing child through publicly posted pictures and video (commonly referred to facial recognition) Detecting the presence of people in surveillance camera footage 			
		Face detection (image and video)				
		Image and video classification	 Identifying endangered animals in image and video for enhanced protection Detecting explicit content 			
		Near-duplicate or similar detection (images and video)	 Detecting hate-speech content for removal of image or video 			
		Object detection and localization (images and video)	■ Detecting fires in satellite imagery			
		Optical character and handwriting recognition (OCR, images)	 Digitizing hard-copy records for quicker patient health history search 			
		Tracking	Tracking illegal fishing vessels via satellite imagery			
	Developing	Emotion recognition (image and video)	Measuring level of student engagement in classrooms nsights/Artificial%20Intelligence/Applying%20artifici			

#JuntosSomosMasFuertes

Aplicación

1	Speech and audio processing	More developed	Person identification (speech)	 Verifying individuals through mobile phone for inclusive banking access based on sound and pattern of voice 				
			Speech-to-text (audio)	 Real-time captioning for the deaf or people hard of hearing to facilitate live conversation 				
			Sound detection and recognition (audio)	 Identifying chain-saw sounds in rainforests for alerts on illegal logging activities 				
		Developing	Emotion recognition (speech)	 Assisting individuals on the autism spectrum who have difficulty in social interactions 				
	Natural language processing	More developed	Person identification (text)	 Detecting a paper's author through handwriting analysis and identification of syntax patterns 				
			Language translation (text)	 Enabling larger distribution of online education services to underserved populations 				
			Other natural language processing (text)	 Identifying plagiarism in student assignments to enhance instructor productivity 				
		Developing	Sentiment analysis (text)	 Using automated review of public sentiment about specific topics to inform policy 				
			Language understanding	Enabling chatbots that understand abstract concepts and ambiguous language, eg, ones that can do second-level, nuanced health screens Olinsights/Artificial%/Olintelligence/Applying%/Olartificial%/Olintelligence/Applying%/Olartificial%/Olintelligence/Applying%/Olartificial%/Olintelligence/Applying%/Olartificial%/Olintelligence/Applying%/Olartificial%/Olintelligence/Applying%/Olartificial%/Olintelligence/Applying%/Olartificial%/Olintelligence/Applying%/Olartificial%/Olintelligence/Applying%/Olartificial%/Olintelligence/Applying%/Olartificial%/Olintelligence/Applying%/Olartificial%/Olintelligence/Applying%/Olartificial%/Olintelligence/Applying%/Olartificial%/Olintelligence/Applying%/O
